WORK EXPERIENCE

Priyo
Jul, 2024 - Dec, 2024

Software Engineer

Role: Backend & Deployment

- **Dolphin-priyo:** A user-management and warehousing application for users from different platforms in Priyo.
  - REST-API develop
  - Visualization by Metabase and embedding
  - Email campaign run with Sendgrid Twillio with dynamic template
  - Multiple authentication handling for cross platforms
- **Priyo-Play**: A platform for hosting quiz for Priyo-users.
- **Priyo-Click:** A platform for campaign-management.
  - Monitoring referral chain
  - Integrating bot-prevention with cloudflare turnstile
- **Priyo-penguin:** An AI-powered chatbot application for answering user queries regarding Priyo's different services and policies

Skills: Django, Nginx, Metabase, Sendgrid, Scrapy, chroma-db, firebase, cloudflare

Intellesphere
Mar, 2024 - Present

Founding Engineer

Role: Fullstack & Deployment

- **Pubali-Intellesphere:** It is an AI powered application aimed at serving customers with their banking-related queries
  - REST-api develop
  - Complex document parsing and processing into vector-database
  - Vector Database with hybrid indexing
  - RAG pipeline with normalization, knowledge-integration and reranking
  - Performance measure across multiple models
  - Authorization with Keycloak
  - Realtime searching functionality
  - Knowledge-base management and audit logging
- **Shajgoj-AI**: It is an AI powered search platform for searching for products with natural language, image and even both
  - Scraping with Scrapy, Scrapy-playwright and ScrapeOps
  - Multimodal Embedding with CLIP model
  - Hybrid indexing with sparse, dense and image embedding
- **Titas-GPT:** An RAG-chatbot for Titas, Bangladesh.
  - Unstructured document integration
  - News data extraction in real time for query serving

Skills: Fastapi, Nginx, Metabase, Openai, Qdrant, Llamaparse, Sveltekit, CLIP, Keycloak, Scrapy with Playwright

Oleyn
May, 2024 - Dec, 2024

Founding Engineer

Role: Backend

- **Shrobon**: Shrobon is a Customer Experience (CX) management system designed specifically for large organizations with dedicated customer centers, offering key features that enhance service quality and efficiency.
  - Live Bengali Transcription Generation with a finetuned ASR model
  - Diarization with NVIDIA NEMO
  - Vector database integration, document parsing
- **Superattorney:** Superattorney is an advanced assistive technology for legal professionals, offering tools that streamline legal research, drafting, and decision-making processes.

Skills: Fastapi, Redis caching, Diarization, ASR, File-Parsing

Yobo
Jan, 2024 - May, 2024

Software Engineer Intern

Role: Backend and R&D

- **YoboSQL:** An AI powered application for chatting with SQL database with natural language

Skills: Fastapi, Sveltekit, cpanel, maria-db, Langchain

SKILL

Backend

- Django
- FastAPI
- Flask
- Springboot

Frontend

- Sveltekit
- Flutter

DB-Migration

- Alembic

Database

- PostgreSQL
- MySQL
- SQLite

ORM

- SQLAlchemy
- Drizzle

DB-Hosting

- Supabase
- Turso

Deployment

- Nginx
- Gunicorn

Vector-DB

- Qdrant
- chroma

VCS

- Git
- Github
- CI/CD

Others

- Competitive-programming (Max: 1750, solve count > 2000)
- Firebase
- Cloudflare
- Keycloak
- Scrapy
- Selenium

EDUCATION

Bangladesh University of Engineering and Technology
2020-2025

Bachelor of Computer Science & Engineering
CGPA: 3.80/4.00(Among top 20% in Academic Performance)
Enlisted twice in Dean's List

ACHIEVEMENTS

Event	Organizer	Year	Result
IUT 11th National ICT Fest 2024 (Hackathon)	IUT & CEFALO	2024	Champion
CodeCrafters Dev Sprint 2024 (Hackathon)	BUET & CodeCrafters	2024	Champion
SUST CSE Carnival 2024 (Hackathon)	SUST & re:tune	2024	Champion
Gen-Dev Hackathon by Acme AI 2024	ACME AI	2024	Runners Up
Blockchain Olympiad & IDSOL 2024 world finalist	BCOLBD	2024	Honorable Mention
ICPC Dhaka Regional-2024	ICPC	2024	70th
LablabAI Reasoning with O1	LabLab AI	2024	Participant
Cefalo ITverse 2023 - (Project Showcase)	DU & CEFALO	2023	Champion

PERSONAL PROJECTS

- ভাষাক: It is a project developed for developing personalized RAG chatbot. The challenging part was to enable users use Banglish (Bangla written in English) and convert it to Bengali. Also it included sharing, customizing bot-behaviour, fewshot inference, transliterate api usage etc
- InsightAI: It is an AI-powered application designed to help university going students with their studies and project-management. Students can manage their course materials, and with the help of AI bots, they can generate note, quiz, flashcard and so on. Also AI agents help with their project from planning to execution by finding related projects, guildelines and even notifying him of deadlines !
- Voyager: This was a hackathon project aimed at developing a tour-planner and explorer application. It on solving some challenges using third party free/ freemium APIs, like GeoApify, WeatherAPI etc. Using these APIs we implemented geolocation, Address autocomplete, Reverse geo-encoding, weather information and forecast, hotel finding, tourist spot finding etc
- CoderHub: It aims to make a strong community where you can share your project experience with others. You can write blogs, comment, do skill based search. We try to implement the best solution for your project management, commit controls. We try to develop a learning platform where you can teach people essential skills. Also we have AI chatbot, planner etc...
- NerdHerd: NerdHerd is a productivity app which focuses on gathering all the productivity features to minimize distraction. Like other learning platforms, our app's mentionable functionalities include collaborative note taking, video calling, article-write, real time quiz, AI chatbot and what not!!
- ShopGenie: It is an AI-powered shopping platform that lets users search for their desired products in natural language. Instead of conventional keyword-based searching process, this project focuses on semantic meaning and multimodal reasoning to get users their desired products. Users can search with text, image, voice and even their combination. It also has recommendation system and sentiment analysis
- BDeHR: It is an Electronic Health Record platform that gives users seamless access to their personal health records. Also it aims at bringing together healthcare components like doctors, hospitals, laboratories, pharmacies for better healthcare support

RESEARCH

- **Memagent**: We aim to develop an AI agent that helps users with any generalized tasks. Users don't need to provide all the details at a time. Rather the model performs any novel task by asking minimum number of questions. Poster Published **here** in CMU. Paper to be published.
- Blockchain with ABAC policy in Drug-supply chain

CERTIFICATIONS

- Machine Learning Specialization (coursera)
- Deep Learning Specialization*(coursera)
- DevOps-AWS Specialization*(coursera)
- Javascript specialization (Udemy)
- Generative AI with Large Language Models (coursera)
- Intermediate Problem Solver (Hackerrank)

SCRAPED-DATASETS

- Fashion Products Dataset
- Cosmetics Dataset
- News dataset
